Abstract (en)

[origin: WO9728038A1] The present invention relates to a dashboard (9) for a vehicle, particularly a motor vehicle, having two sides extremities (10, 11) interconnected by a medial part (12), said dashboard (9) being appropriate to at least diffuse laterally an air flow into the occupants space of the vehicle. According to the invention, the dashboard has an air flow emission zone (15), offset with respect to the medial part (12), cooperating with means (16) for guiding externally the air flow emitted along said dashboard (9) and providing for its lateral diffusion.
