Abstract (en)

In order to restock with corrugated tape a machine for applying fasteners, a pack (1) is provided in which the tape (2) is wound in a reel and held in this configuration by bands (5). A support (6a) is also provided, the ends of which are fitted with two discs (6b), (6c), one of which (6c) is removably mounted on the support. In order to apply the fasteners, the reel of corrugated tape is mounted on the support (6) of the machine once the removable disc (6c) has been removed. In this way, advantageously, the only material to be discarded when restocking the machine with tape is the bands (5). <IMAGE> <IMAGE>
