Abstract (en)
[origin: EP0878587A1] The installation has a pressurised receiving tank (1) connected to an enclosed waste water source which is periodically emptied by a collection tank. A geodesic intermediate tank (13), which is located lower than the receiving tank and connected via an outlet conduit (11), is provided and is connected to the collection tank via an emptying conduit (19). A pressure source (21) generating the pressure above the collection tank is connectable with the intermediate tank via a closable conduit (28).
