Abstract (en)

[origin: WO9728062A1] A wrapper (100) comprising a main portion (101) and a complementary external overlaid panel (103) connected to the main portion (101) along two parallel seams (102, 105). The two seams (102, 105) are closely spaced so that the complementary panel (103) defines a narrow space (104) for housing at least one elongate accessory (10). The complementary panel (103) further includes at least one cut-out (110) defining the outline of a pull-tab (111) with side edges extending towards a free upper or lower edge of the panel to enable the removal of a flap (115) formed by tearing the corresponding portion of said panel.
