Abstract (en)

[origin: WO9823698A1] The invention concerns a hot-melt adhesive with a base of a copolymer (A) comprising the following units: ethylene, optionally a monomer selected among vinyl esters or alkyl (meth) acrylate, at least an unsaturate epoxy. It can be formularized with a tackifying resin and a wax. Ethylene copolymers, n-butyl acrylate and glycidyl methacrylate are advantageously used.
