Abstract (en)
[origin: EP0879587A2] The seating arrangement enabling a disabled user to be seated in a vehicle includes a seat capable of acting in wheelchair mode and provided with a guide for engagement with a rotatable mount provided in the interior of the vehicle. The seat is backed from a position supported on the wheels externally of the vehicle into a supported position on the mount in the interior of the vehicle, and the mount is then rotated to a driving position. <IMAGE>
