Abstract (en)
A closure cap for bottles (F) and the like containing fluid substances, including an inner tubular body (2) to be secured to the mouth (C) of the bottle (F) and carrying an axial pin obturator (13), and an outer tubular body (3) connected to the inner tubular body (2) through a threaded coupling (10,18) and having a delivery nozzle (19) terminating with an outlet opening (22) which, in a screwed condition, is plugged by the pin obturator (13). Further to a sliding lateral sealing (15,23) and a front sealing (11,24), a second front sealing (16,25) is provided to more efficiently isolate the threaded coupling (10,18) in the screwed condition of the outer tubular body. <IMAGE>
