Abstract (en)  
[origin: EP0881015A1] The apparatus includes an oscillating continuous casting mould (4) fixed to a table (2) which has an oscillation drive and is mounted on a stationary base frame (1). The mould has guide elements which take the form of plate frames (7) with cross members (9). Two opposing plate frames (7) are joined into a plate frame pair (7a, 7b). Each plate frame is connected on one side to the base frame and on the other side to the table (2).
