Abstract (en)

[origin: EP0881098A1] The roller has an outer printing or coating layer (1) and a series of linked concentric layers (2, 3, 4), at least one of which contains a material conferring thermo-shrink properties. The thermo-shrink layer can be the outer printing or coating layer, over a compressible layer (2) and a supporting layer (3), and it is made from a material based on polyethylene, PVC, polyamide, propylene, polyvinylidene fluoride, or other polymers having a crystalline level of 10 - 60 per cent.
