Abstract (en)
A container or case for products in phials is provided with a box structure (1) to separate the phials comprising a first and a second wall (2,3) connected by a plurality of tabs (8,8') that form double wall cells (9); the box structure and body of the container (13a, 15-17) derive from a single die-cut element which is folded several times to form the complete container. <IMAGE> <IMAGE>
