Abstract (en)

[origin: EP0881168A2] The carrying arrangement (1) is for a heavy piece of machinery (6). It is used for handling a machine which stands on the floor and contains a liquid in a container, which could be environmentally damaging if it leaked. The carrier comprises a bath (2) with sidewalls (4) and locating members. One of the sidewalls has a catchment surface (7). The sidewall with the catchment surface preferably has a polyethylene container.
