Abstract (en)  
[origin: EP0881537A1] A photographic processor and method for developing photosensitive material (20). The apparatus comprises a processing tank (12) containing a processing solution (18) for processing of the photosensitive material (20); a transport mechanism (52,54,56,58,60) for moving of the photosensitive material (20) through the processing solution (18); and a heating and/or cooling mechanism for providing a temperature gradient across the photosensitive material (20). <IMAGE>
