Abstract (en)

[origin: EP0881792A2] When there is a plurality of programs of a set program type being broadcast, a user is allowed to recognize this plurality of programs and to be able to select the desired program. A control section (17) determines whether there is a plurality of programs of a program type specified by a user. When there is a plurality of programs, (1) the fact is displayed and the sound of the program of the set program type is selected and caused to be output by operating a program selection key PSK, or (2) the sound of the program of each set program type is output at fixed time intervals, and the sound of a program selected by operating the program selection key is continuously output, or (3) all the labels of the program of each set program type are displayed on a display section (18a) and the sound of a selected program is output. <IMAGE>
