Abstract (en)
[origin: DE19608285A1] The invention concerns a high-voltage outdoor switch comprising a housing (3, 4) and an interrupter unit (5) disposed therein. A current transformer (10, 11) is disposed on each side of the interrupter unit on the switch housing. Hitherto it was conventional to install current transformers separately from high-voltage outdoor switches. The structural combination of the switch and the current transformers simplifies assembly and reduces the costs.
