Abstract (en)
The product recipients and distributors (7) which take the form of a jug with a lip (8) are fixed to the inside of the front face of the upper basket (5). High pressure water is supplied to the recipient (7) through a horizontal conduit (14). The horizontal conduit (14) is connected to the supply side (12) of the mill (6) and the high pressure water is fed to the recipient (7) through a U shaped passage (10) astride one wall (9). The product within the recipient distributor (7) is dispersed by the high speed and direction of the water and is aided by the lip (8).

Abstract (fr)
Le dispositif de l'invention comprend essentiellement un récipient distributeur (24 fixé sur le panier supérieur (5) et l'évacuation des produits qu'il contient est assurée par le jet d'eau du moulinet (39) qui le fait basculer de la position de remplissage par l'utilisateur à la position d'évacuation.
