Abstract (en)

[origin: EP0882850A2] The brick has a number of acoustic damping channels (15) in the outer wall (1). The channels (15) run from at least one side of the outer wall (1) inwards, parallel to a long side of the brick. The channels (15) can run from the under side of the outer wall (1) at least vertically upwards and/or from the upper side vertically downwards, in at least two rows.
