Abstract (en)  
The system comprises a mortise lock (10) with catch (12), bolt (14), a first profiled cylinder (18) adjacent to a cuff (16) (sic), and a second profiled cylinder (22) at the opposite side of the first to the cuff. The first cylinder is semi-cylindrical, giving a lock tongue movement of 180 degrees with a locking movement through 360 degrees. It can be actuated by a cylindrical or security key, while the second one can be actuated by a special inserted key. Both cylinders can be designed for operation from one side only, while the catch (12) can be actuated by one or more door-pawls. The second cylinder can be actuated by a hand lever from the opposite side.

Abstract (de)  
Ein Schloß-Beschlag-System mit einem Einsteckschloß (10) weist eine Falle (12), einen Riegel (14), einen ersten, einem Stulp (16) benachbarten Profilzylinder (18) sowie einen zweiten Profilzylinder (20) auf, der auf der dem Stulp (16) entgegengesetzten Seite des ersten Profilzylinders (18) angeordnet ist. Der erste Profilzylinder (18) ist ein Profil-Halbzylinder, der bei einem Schließweg von 360° einen Schließbartweg von 180° aufweist.
