Abstract (en)

[origin: WO9732371A1] The invention relates to a contact tongue (2) obtained from a metal plate (1) in such a way that a first push-out aperture (6) is made in an initial stamping operation, around which is formed a stamped section (4) and a projecting contact button (5) and, in a second stamping operation, a tongue (2) is produced from the metal region made thinner and denser by stamping and bent in such a way that the free end of the tongue (2) projects from the stamped section (4) above the plate (1).
