Abstract (en)  
The wire 4 of a temperature sensor 3 or the like is lead through an orifice 23 in the door 12 of an autoclave 1 adjacent a mounting aperture 22. A bolt 24 extends through the mounting aperture 22 and its head 25 compresses a rubber sealing washer 26 about the orifice 23 on the inside of the door. A threaded nut 28 engages the other end of the bolt 24 on the outside of the door 12, the nut having a central boss 30 that exposes the outside end of the orifice 23. <IMAGE>
