Abstract (en)

Device for delivering fluids contained in bottles (1) or the like, comprising a rigid body (10) inside which the pipes for sucking up (11) and directing (12) the said fluid are formed and to which the means (14) for operating a piston (15,15b,15c) delivering the fluid are hingeably connected, there being provided resilient means (17;117;217) integral with the body (10) itself and designed to interfere with a part (16;116;216) of said operating lever (14) so as to cause the return movement of the latter into the rest position after operation thereof for delivery. <IMAGE>
