Abstract (en)  
[origin: EP0884259A2] A first suction chamber (2) in the form of a main suction box is connected directly to a further, suction chamber in the form of an auxiliary suction box (9) on the discharge end of the delivery table, by means of a suction connecting pump. The top surfaces of the suction chambers have openings over which circulates a suction belt (7) possessing openings, and with a breather (6) for producing a vacuum in the suction chambers. A suction pipe (10) inside a pipe (5) connected to the main suction box opens into a socket (12) opening towards the breather. The suction pipe has ventilation openings (15) with dispenser (13) with matching ventilation openings (14).
