Abstract (en)
[origin: EP0884803A2] An electric terminal (9; 29) having a connecting portion (17; 17') for connection to an electric system, and a contact portion (18) mating transversely with a substantially cylindrical-pin-shaped electric termination (7); the contact portion (18) having a pair of facing elastic blades (21), which in turn have respective curved portions (27) with facing concavities defining a seat (28) for the respective termination (7), and respective diverging end portions (26) defining a lead-in for the termination (7). <IMAGE>
