Abstract (en)
[origin: DE19650012A1] A gripper actuating system for printers is disclosed. The object of the invention is to provide a gripper actuating system for printers fitted with several rows of grippers and in which a sheet is supplied only to every second row of grippers and discharged only from every second row of grippers. This object is attained in that a fixed gripper actuating cam (11) which co-operates with first rollers (22) of roller levers (10) to actuate the grippers located in rows (3) of grippers (3) is associated to a locking segment (24) having locking surfaces, turning at the speed of rotation of the cylinder and co-operating with second rollers (23) of the roller levers (10).
