Abstract (en)
[origin: EP0885571A2] The adhesive foil strip (2) can be detached by pulling in the direction of the adhesive plane (B). The strip is stuck on its one adhesive side to the one side of the touch and closure fastener (4,7) whilst the other side of the fastener is left free for fixing. This other side can be stuck to a further adhesive foil strip (8) which can be detached by pulling in the adhesion plane. The adhesive foil strips (2,8) are each covered on their free non-adhesive side to a cover foil. The touch and close fastener can be separated and rejoined and the or each adhesive foil strip can be removed without residue by pulling in the adhesion plane so that the touch and close fastener can be re-used.
