Abstract (en)
[origin: EP0885635A2] A device for regulating the length of a swimming goggles strap (5), said goggles comprising a pair of supporting frames (1) providing a couple of parallel fins (3) radially extending from the outer side of each frame, the free ends of each couple of the fins being joined by a respective pivot (4), strap (5) wrapping around each pivot and having a plurality of transversal stop-ribs (7). The device comprises a respective stop lever (9) and a tooth (8) extending from it, engageable with one of ribs (7), said stop lever comprising a first arm (11), having a first end pivotally connected to fins (3) and a second end abutting against said frame, and a second arm (10), from the substantially intermediate section of which said tooth transversally extends, said second arm having a free first end for operating and a second end which is integral to the second end of said first arm <IMAGE>
