Abstract (en)

A method and apparatus for making building panels, which includes: (a) supplying at least one hollow panel to a pre-heated oven; (b) circulating warm air in the pre-heated oven so as to achieve a heated hollow panel having a uniform determined temperature inside and outside the respective hollow panel; (c) introducing a dosed amount of uncured foamable formulation into the or each hollow panel; and (d) subjecting the or each panel containing the uncured formulation to an elevated temperature to enable foaming and curing of the formulation inside the or each panel.
