Abstract (en)
A high-density granulated detergent composition having a bulk density of 0.6 to 1.2 g/ml, which comprises 0.5 to 30 wt.% of an aspartic acid-N,N-diacetic acid salt (a), 20 to 50 wt.% of an anionic surfactant (b) and 1 to 30 wt.% of an aluminosilicate (d), each percentage being based on the total weight of the composition, and which further contains a nonionic surfactant (c) having an HLB value of 10.5 to 15.0 in an amount of 0.5 to 25 parts by weight per 100 parts by weight of the component (b). This composition contains an organic builder excellent in biodegradability together with an inorganic builder and exhibits high detergency.
