Abstract (en)

[origin: EP0886007A1] The waggon (1) is for long rails (12). It has a bogie frame (6) with rails for a rail loading crane (8) with drive. A cable winch (16) for a traction cable (18) with free end is fastened to bogie frame or crane. The cable is wound on/off, to form a length-adjustable connection between bogie and crane. If the winch is fastened to the frame, a rotating deflection pulley at one end of the bogie frame, is fastened to the waggon.
