Abstract (en)

[origin: EP0886029A2] The webs (12,13) of the angle piece (11) are built with a U-shaped cross section, and are built from the outer region of one side of projecting links (15,16), via a plate-shaped cross link (14). The webs of the angle piece are clampable and/or lockable in the hollow profiles (2,3). The links may be elastically deformable in the longitudinal direction of the webs. The angle piece may have a lock mount (21) between the two links, whilst one or both of the links may have an import cant (18).
