Abstract (en)

[origin: EP0886115A2] The system has a housing (1) with a swivelable bracket (3), a top (5) and a bottom (6) and with intermediate partitions (7) in between. One carrier unit at least is provided for containers and with at least one vertical swivelable bracket. At least two vertical swivelable brackets have a common swivel axis and are connected with each other and can have at least one cross bar. The system as a carrier unit contains at least one intermediate partition (7), which at the front edge has a step shaped edge (4). The system has facilities for arresting the swivelable bracket, which can be in the form of a spring shackle. A foldable handle (8) is provided at the top of the housing (1).
