Abstract (en)
[origin: EP0886194A1] The laser printer (1) is supplied with paper (30, 30', 31) to be imprinted in an area between an image drum (9) and an opposite corona station (6) which is stored flexibly. The corona station is preferably tiltable around an axis proceeding in transport direction of the paper to be imprinted. The corona station is preferably formed as a plate, whereby three, parallel to each other and to the longitudinal axis of the image drum proceeding metal paths or metal wires (50, 51, 52) are embedded in an electrically isolating disk (19) of the corona station.
