Abstract (en)
[origin: EP0886224A1] The computer system for scientific-engineering calculations contains at least a group of processor units (1-1...1-N), a switch (2), a auxiliary switch (3), a group of associative memory modules (4-1...4-N), a buffering block (5) and provides the information processing without inter-processor exchange, hence, decreasing the time for program processing. <IMAGE>
