Abstract (en)

[origin: EP0886256A1] The container, e.g. a yoghurt pot, has its outer wall covered at least partially by a label (4) made up of an outer layer with symbols or images (6) visible from the outside, and an inner layer (7) which is attached by adhesive to the pot surface. The label also incorporates an intermediate layer (8) between the outer and inner layers and having different levels of adhesion with them, so that the label can be removed easily from the pot, leaving the inner layer attached to it. The intermediate layer is made from a silicone-based product, e.g. a silicone oil like polysiloxane, or a mixture of a polymer resin and a silicone based additive. The polymer resin is selected from a group comprising nitrocellulose-based varnish, vinyl, acrylic and polyester resins. The intermediate layer can also be made from an erucamide or oleamide.
