Abstract (en)
The plug connector has at least one press-in insert (9) on the circuit board side connected to the plug connector insulating body (1) by a rotational or hinged joint and which holds the solder connections (24,25) for the plug connector's contacts. The plug connector is opened for the assembly process, so that a trigger (6) opens the press-in insert against the force of the contact springs for insertion of the circuit board. At least one side of each solder connection is pressed against the circuit board by the press-in body, whose pressure is applied by the spring force of the contact springs.

Abstract (de)
Für einen Steckverbinder für Kartenrandmontage, insbesondere einen 2- oder mehrreihigen Steckverbinder, wird vorgeschlagen, daß die Leiterplattenanschlußseite des Steckverbinders mindestens einen drehbar bzw. klappbar mit dem Steckverbinder-Isolierkörper verbundenen Andruckkörper aufweist, in dem die Lötanschlüsse der Kontakte des Steckverbinders gehalten sind. <IMAGE>
