Abstract (en)  
[origin: WO9733666A1] A frame for skates and the like with a structure comprising at least one bearing surface (3, 4) engageable by a boot or the like, and a side flange (2) comprising means for attaching one or more ground-engaging members. The components (3, 4 - 2, 8) of the structure are made of at least two at least partially mutually assembled materials having different mechanical properties.
