Abstract (en)

[origin: WO9733728A1] A shaving system comprising a support, at least one blade (20) and a skin-engaging element comprising a skin-engaging resilient foam material (60). In a preferred embodiment, the skin-engaging element is attached to a guard (40) and comprises a resilient foam material and a shaving aid. Also, disclosed is a method for making a razor head having a skin-engaging resilient foam material.
