Abstract (en)

[origin: DE19607998A1] The invention relates to a process and device for packaging foodstuffs having a recess, especially such meats and sausages and gutted poultry, in which a previously sealed tubular section (10) is taken through the aperture by means of an insertion pin (11), whereafter one end of the tubular section is turned back around the hollow body towards the other end in order fully to encase the foodstuff (12).
