Abstract (en)

[origin: EP0887296A2] The winder unit for winding part-webs (4,5) onto reels (6,7) has at least two reel positioning groups (14,15) spaced part from each other, and has a guide (16-35) for the part-webs between the cutter unit (2) and the reel positioning groups. The guide for each reel positioning group has a path and pneumatically operated shunt (16,17) for attaching to the cutter unit and consisting of two blow-pipes or deflector plates.
