Abstract (en)

[origin: EP0887464A1] The machine (1) has a travelling chassis (2) connected via drives (10) to a stabilizer device (9). A height-adjustable ballast plough (8) is directly fastened to the stabilizer to form a single construction unit. the ballast plough is also positioned in front of the stabiliser device in a working direction of the machine. The plough is height-adjusted relative to the stabilizer by a drive.
