Abstract (en)
[origin: WO9728974A1] The invention concerns a transfer label comprising: a carrier material layer (1); a printing layer (5) which is detachably disposed on the carrier material layer (1) and can be affixed to an object by adhesive (7); and a protective layer (3) which is disposed between the carrier material layer (1) and the printing layer (5) and can be detached from the carrier material layer (1). The protective layer takes the form of a substantially non-plasticizeable protective film (3) which sticks directly to the carrier material layer (1) by adhesion yet can be detached substantially independently of the label temperature and is made of a completely polymerized material.
