Abstract (en)

[origin: WO9813305A1] A method for inhibiting microbial colonization of a surface in contact with an aqueous system is disclosed, the method including adding to the system an amount of at least one compound including repeating ethylene oxide units. Also disclosed is a multi-component composition comprising a polyoxypropylene-polyoxyethylene block copolymer and a biocide, and a method including applying the composition to a surface in contact with an aqueous system in order to reduce the formation of deposits on the surface.
