Abstract (en)
[origin: WO9733847A1] A turbine-powered, synthesis-gas system and method include a gas turbine (206) having a synthesis gas production unit (202) and a synthesis unit (204) disposed between the compression section (208) and expansion-turbine section (210) of the turbine (206). Additionally, a booster compressor may be added between the synthesis gas production unit and the synthesis unit. Also, a compressor may be added after the synthesis production unit and the gas turbine.
