Abstract (en)

[origin: EP0888736A2] The service trolley has at least one storage surface (9-12;9a-12a) about which on one side of a cabinet (3), a vertical axis (8), from one side of a glass door's (4) oriented position, is rotatably held in front of the glass door's gripping position. The multiple overlaid storage surfaces may be rotatably held on the common vertical axis. On both sides of the cabinet there may be at least one stack plate (9-12;9a-12a) arranged on the vertical axis. The stack plates may look arc-shaped in perspective. The overlying stack plates may be connected together in the vicinity of its free ends.
