Abstract (en)

[origin: EP0888830A2] The suction device has a suction carriage connected to the vehicle (2) by a keyed connection which can be mechanically locked and released. A fixing head (3) is fixedly mounted on the vehicle and the connection with the suction carriage is produced by the clamping device. The fixing head can have a rear cut section for clamping bars (5,6) to engage. The clamping bars are rotatably mounted on bolts (17,18) in a housing set on a connecting sleeve.
