Abstract (en)

[origin: EP0889449A1] The integrated module is provided for a point-of-sale terminal which has a built in reader (5) that accepts smart cards (4). The reader communicates with a main processor base module (6). The base module is connected with a keypad (3), display (2), security module (8) and a transaction module (7). The transaction module has software determining the protocol of the system. Financial transactions are carried out after the system has executed a sequence of initialisations.
