Abstract (en)
[origin: DE19612720A1] In a thread feed (F) with a stationary storage drum (T) having at least one cylindrical closed circumferential section (8) and a stationary annular thread control member (S) surrounding the circumferential section (8), the thread control member (S) is a finite strip (B) of uniform cross section, the facing and adjacent ends (16, 17) of which are laid on the circumferential section (8), where the strip (B) is circumferentially rigid and flexible in the radial direction of the storage drum (T) and an elastic tensioner applies the strip under elastic pre-stress at least force-fittingly to the circumferential section (8).
