Abstract (en)
[origin: EP0890394A2] The fluid container comprises a trough-like lower part (2) and lid-like upper part (3) connected together along their matching superposed end edges (20,21). Wheels (14,15) are fitted on the container to form together a chassis. The motor pump unit (26) is held on the outside of the container. The container can be divided into separate individual containers (8) through the internal walls (7,18) of the trough like lower part and lid part. The end edges of the upper and lower part are welded or stuck together.
