Abstract (en)

[origin: EP0890668A2] The stamped needle, for a knitting machine, has at least one free space formed in the shaft. It is filled with a heterogenous material, bonded at an edge at least in lengths from at least one zone (20) of reduced shaft thickness. It is firmly bonded to the shaft and extends into the edge zone (20) of reduced shaft thickness. The edge zone (20) of reduced shaft thickness has a cross section shape from a zone (21) of min. thickness at the side of the shaft with an increasing thickness to a zone (22) near the free space of a max. thickness.
