Abstract (en)

[origin: EP0890690A1] This invention is to be used in Pillar formworks and is made from plastic material composed of two different parts. The exterior formwork and the interior called as a wrapper(8). This part is to be used only once and is in direct contact with concrete. The interior formwork(3-4-5)do not need to be oiled and cleaned after the dismounting. It has the characteristic to be extendible to form square(1) or rectangular(2) sections. It can also be round section. <IMAGE>
