Abstract (en)

[origin: EP0890874A1] A light-sensitive silver halide photographic material is provided comprising a support, one or more water-permeable light-sensitive silver halide layer(s) on one or both sides of the said support and a protective antistress layer, wherein each layer of said material comprises a non-ionic polyoxyalkylene compound in an amount of from 0 to less than 5 mg/m², wherein said protective antistress layer and/or said light-sensitive layer(s) comprise(s) an ionic polyoxyalkylene compound and wherein said material has a lateral surface resistance, determined as prescribed in DIN 53482, of less than 1 x 10¹⁰ Ohm/square.
